(a)
P
(b)
θ
r = R(s, θ)
(b) one layer, N = 9 Chebyshev nodes per ray
free surface: n̂ · τ = 0,
ϕ1 matched to the outside
n̂
interior nodes: equations
(3)--(4), projected with
eq. (12)
interface: u, n̂ · τ, ϕ1
and gravity flux continuous
radius r (km)
